1 / 1
point

1. In Git, branching is the inverse process to:

- ☐ pushing
- ☐ forking
- ☐ committing
- ☒ merging

Correct

Merging is the inverse process where branches are coalesced

1 / 1
point

2. A detailed branching history can be shown by:

- ☒ **git show-branch**

Correct

This does the job

- ☐ **git branch show**
- ☐ **git branch --show**
- ☐ **git show branch**

0 / 1
point

3. To examine an earlier version of a file in commit **3888bc981a**, do:

- ☐ **git log 3888bc981a kernel/sys.c**
- ☐ **git display 3888bc981a:kernel/sys.c**
- ☐ **git show 3888bc981a:kernel/sys.c**
- ☒ **git show 3888bc981a kernel/sys.c**

This should not be selected

The colon is missing between commit number and file name

1 / 1
point

4. You can list all current branches on the local machine with:

- ☒ **git branch**

Correct

This does the job and is identical to specifying **--list**

- ☒ **git branch --list**

Correct

This does the job

- ☒ **git branch -v**

Correct

The **-v** here is for verbose and gives more information than without it

0 / 1
point

5. The command **git checkout some_branch**

- ☐ Incorporates changes in **some_branch** into the current branch
- ☐ switches to **some_branch**
- ☒ Gives some information about **some_branch**

This should not be selected

This is incorrect
