✓ Congratulations! You passed!

1/1	1.	
1/1	1.	Which of the following statements is true?
point		Once you have begun a file in vi, you cannot edit it in emacs without running a conversion program first to strip out embedded information in the file
		Once you have begun a file in emacs, you cannot edit it in vi without running a conversion program first to strip out embedded information in the file
		You can go back and forth between editors as much as you would like without a conversion process
		Correct
		Both editors do not embed any special information, so any text editor can be used on a file
		Which of the following motheds can be used to produce a file with 2 lines in it2 Calest all
1 / 1 point	۷.	Which of the following methods can be used to produce a file with 3 lines in it? Select all answers that apply.
		\$ cat << EOF > myfile > line one
		> line two
		> line three
		> EOF
		\$
		Correct This option works
		This option works
		\$ echo line one > myfile
		\$ echo line two > myfile \$ echo line three > myfile
		Un-selected is correct
		\$ echo -e 'line one\nline two\nline three ' > myfile
		Correct This option works
		\$ echo line one > myfile
		\$ echo line two >> myfile
		\$ echo line three >> myfile
		Correct
		This option works
	3.	Which statement is true?
1 / 1 point		emacs involves switching between command and insert mode by hitting the
		Escape key
		vi involves switching between command and insert mode by hitting the Escape key
		<b>Correct</b> vi has these command modes
		vi has these command modes  nano involves switching between command and insert mode by hitting the
		nano involves switching between command and insert mode by hitting the Escape key
		vi has these command modes  nano involves switching between command and insert mode by hitting the
	4.	<ul> <li>nano involves switching between command and insert mode by hitting the Escape key</li> <li>edt involves switching between command and insert mode by hitting the</li> </ul>
1/1	4.	<ul> <li>vi has these command modes</li> <li>nano involves switching between command and insert mode by hitting the Escape key</li> <li>edt involves switching between command and insert mode by hitting the Escape key</li> <li>Which pair of editors has partisan advocates who tend to wage war over which is better</li> </ul>
1/1 point	4.	nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?
	4.	<ul> <li>nano involves switching between command and insert mode by hitting the Escape key</li> <li>edt involves switching between command and insert mode by hitting the Escape key</li> <li>Which pair of editors has partisan advocates who tend to wage war over which is better than the other?</li> <li>gedit and emacs</li> </ul>
	4.	nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano
	4.	vi has these command modes  nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano
	4.	vi has these command modes  nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  Correct
	5.	vi has these command modes  nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  Correct
point  1/1		nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  Correct  vi and emacs have very partisan advocates who waste their time fighting
point		nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  Correct vi and emacs have very partisan advocates who waste their time fighting  Which editor can always be found installed by default on virtually any Linux system?
point  1/1		nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  Correct  vi and emacs have very partisan advocates who waste their time fighting  Which editor can always be found installed by default on virtually any Linux system?  emacs
point  1/1		nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  Correct  vi and emacs have very partisan advocates who waste their time fighting  Which editor can always be found installed by default on virtually any Linux system?  emacs  WordStar  kwrite  libreoffice
point  1/1		vi has these command modes  nano involves switching between command and insert mode by hitting the Escape key  edt involves switching between command and insert mode by hitting the Escape key  Which pair of editors has partisan advocates who tend to wage war over which is better than the other?  gedit and emacs  pico and nano  vi and nano  vi and emacs  correct vi and emacs have very partisan advocates who waste their time fighting  Which editor can always be found installed by default on virtually any Linux system?  emacs  WordStar  kwrite
