Retake

✔

1 / 1 point

1. If there are two branches, **br1** and **br2**, showing all differences between them can be done with:

   ⦿ **git diff br1 br2**

   Correct
   This will show all differences between the branches

   ◯ **git diff --show br1 br2**

✖

0 / 1 point

2. Showing which files have changed between two branches can be done with (Select all answers that apply):

   ☒ **git diff --pretty br1 br2**

   This should not be selected
   This will show detailed differences, not just files

   ☐ **git diff --stat br1 br2**

   This should be selected

   ☐ **git diff --show br1 br2**

   Un-selected is correct

   ☐ **git diff --numstat br1 br2**

   This should be selected

✔

1 / 1 point

3. Showing all differences between the current working tree and the last commit can be done with:

   ◯ **git diff --clean**

   ◯ **git diff --latest**

   ⦿ **git diff**

   Correct
   Without a branch or commit name, **diff** shows relationship to the last commit on this branch

   ◯ **git diff --working**

✖

0 / 1 point

4. In the command **git diff tag1 name2**, if **tag1** is a tag, **name2** can be a (select all correct answers):

   ☒ another tag

   Correct
   git diff can diff tags, branches and commits

   ☐ a branch name

   This should be selected

   ☐ a previous commit identifier

   This should be selected

✔

1 / 1 point

5. How can you see the differences in **file1** between **tag1** and **tag2**?

   ◯ **git diff tag1 file1 tag2**

   ⦿ **git diff tag1 tag2 file1**

   Correct
   This is the correct syntax

   ◯ **git diff file1 tag1 tag2**
